Defects while using vehicles

Electric vehicles have a high initial purchase cost, and many consumers cannot afford them in their budgets, thus they are hesitant to move from regular vehicles to electric vehicles. Due to the lack of electric car models accessible to the market, buyers have few alternatives in terms of design, appearance, or customized variants Uneven tyre wear and engine overheating due to raising the accelerator, paint fading due to sunlight and one of the the problem low fuel mileage, Engine gets seized due to low engine oil level, A bad battery also exhaust system problems and fuel system issues, Brake doesn't work suddenly is one of the major reason

Feasability
